⚙ EXPERIENCE

Mobile Engineer | Bible Height Mission (Contract) | June 2024–2025

- Built and shipped the OYBS app from scratch in Flutter, delivering a single code base to the App Store and Play Store with REST-based scripture content, offline mode implementation and caching implementation, audio playback, Bible highlighting, Bible text with image sharing implementation, and push notifications.
- Boosted engagement by adding in-app Bible quizzes and a community chapter-review module, creating an interactive study experience for users.

Mobile App Developer | Wave5Wireless | October 2023–November 2024

- Worked with a diverse team of over 5 software developers and two designers in resolving bugs across mobile apps, aligning closely with Figma designs.
- Instrumental in delivering all pending features, collaborating in design, definition, and deployment; ensured seamless integration with RESTful APIs for optimal performance, quality, and third-party service integration.

Mobile App Developer | Determinas Technologies | March 2022-October 2023

- Contributed to the successful enhancement of three distinct apps through agency work.
- Improved SaaS application's mobile code base, resolving user pain points and achieving a 30% reduction in development time by implementing efficient architecture and reusable elements.

⚙ TECHNICAL EXPERIENCE

Projects (Recent)

- OYBS (February 2025): The OYBS app is designed to assist individuals in enhancing their faith and comprehension of the Bible through a comprehensive year-long study plan. It features user-friendly tools, daily devotionals, community interaction, progress tracking, and quizzes. App store, Play store
